

General information
group 6
school year 2025-2026

Personnel

group 6		
Mon, Tues & Wed	Juf Esther	esther.dejong@wijwijzer.nu
Thurs & Fri	Juf Patricia	patricia.langeveld@wijwijzer.nu

organisation		
Special Needs co-ordinator Mon, Wed, Fri	Petra Voorderhaak	petra.voorderhaak@wijwijzer.nu
Teamleader Mon to Wed	Annick van der Voort	annick.vandervoort@wijwijzer.nu
Head Mon to Thurs	Lisa ter Veen	lisa.terveen@wijwijzer.nu

Start of the day

The classroom opens at 8:05am and lessons start at 8:15am. We expect group 6 children to come into the classroom on their own whenever possible.

Physical Education P.E.

We have P.E. lessons every Monday and Friday. Please provide your children with sports clothes and training shoes for the lessons. Children with long hair will need hairbands to tie their hair up, it might be a good idea to put extra hairbands in your child's gym bag. Please can you arrange this with your child. Jewellery, such as necklaces and bracelets, must be removed before the lesson.

Food and drink

The children keep their snack in their bag. The bags are kept in a specific place in the corridor. We think it's important to give your child a snack that is as healthy as possible. Wednesday is 'gruitdag', so all the children must only bring fruit or vegetables, for their snack, on this day.

Birthdays

We celebrate your child's birthday in the classroom. Your child can give a treat to

their classmates.

A children's birthday party is, of course, very pleasant for your child and the children who are invited, but to avoid the other children's disappointment, we request that you hand out the invitations outside the school and not in the classroom.

Subjects and course books

You can see which other subjects and courses we follow in the school guide on the website. Please see below for extra information about the subjects that are particularly relevant for the children in group 6.

Arithmetic and numeracy

We use the following maths course in the maths lessons; De Wereld In Getallen 5 (WIG 5) (The World in Numbers). This course offers plenty of repetition of the material. The children are given two blocks to master new strategies. After the two blocks have been completed the children will be tested to check whether or not the goals have been achieved. This course provides a great deal of differentiation as well as repetition and has been designed to enable the children to practise at different levels according to their abilities. From group 7 there will be an opportunity for children who find maths difficult to work on a separate learning path (Fs). We will, of course, consult parents to discuss whether this is acceptable or necessary. This year we're going to start fractions and numerical arithmetic.

Reading

Since 2021 we have been working with a new 'Blink Lezen' course. Why do we like reading? The answer is simple: because we want to know what happens next in the story. This inquisitiveness is the basis of 'Blink Lezen'. It is a complete reading method for groups 4 to 8. The course is a combination of technical and fluent reading, reading comprehension (and watching/listening), in-depth reading, free reading and reading aloud. 'Blink Lezen' increases the children's inquisitiveness and interest in reading with compelling stories. The various different assignments are never boring. Reading opens up the world to the children, a world full of exciting events, special experiences and surprising people. The children discover more about the world around them and themselves.

Language and spelling

Since last school year we have been working with a new language and spelling course, in groups 3 – 7, known as Staal 2 (group 8 will start this school year). Group 3 will start on the spelling part of the course after the Christmas holidays.

Spelling

Staal is based on the proven, preventive spelling approach developed by José Schraven. The fixed rhythm, repetition every lesson and daily dictations (spelling tests) ensure optimal results in spelling. Staal also combines spelling and grammar and is the first method to do so. The children learn the names of new categories and the corresponding new rules alongside previously learned categories and rules which are repeated every day. As a result, the children's knowledge expands and builds on previous information to ensure they learn more effectively. The children learn more effectively when the category and spelling rules are explained in the same way and this is continued and built on throughout the school years.

Language

Staal works with rich and meaningful texts that suit the childrens' world of experience. The theme always starts with 'the grej' of Staal in which the children are introduced to the new theme. The new theme is discussed in detail in the accompanying magazine and workbook. The following areas are covered in a fixed order:

- Vocabulary
- Understanding the language
- Reading comprehension
- Speaking and listening
- Writing

The children work towards producing a final piece of work through a variety of texts and assignments.

World orientation (working in themes and learning by discovery)

We use the 'Blink Wereld' coursebook for world orientation lessons. Blink is an integrated course which teaches geography, history, the natural world and technology.

There are also tests for this subject and we call these tests 'Test jezelf' (test yourself). The children can prepare for these tests using the 'leerwerk' (revision work) on Google Classroom. The test dates will be communicated via Parro.

TopoMaster

We use the online programme 'TopoMaster' for topography (physical geography). 'TopoMaster' is an exciting online game where the children learn about physical geography. The app was developed by National Geographic Junior and contains beautiful images and fascinating information. Through topography the children learn special facts about animals, buildings and the landscape, which helps them to remember the toponyms (names of places) better. 'TopoMaster' consists of three parts: the Netherlands, Europe and the world, each of which contains several levels. Last school year the children learned about the Netherlands. In group 6 we will repeat the lessons learned and expand their knowledge further.

The children can prepare for these tests using the 'leerwerk' (revision work) on Google Classroom. The test dates will be communicated via Parro.

English

We have been working with 'Blink Engels' since last school year. Each lesson focuses on a well-known song. Music has a positive impact on children and encourages them to move, which also helps them to remember the things they have learned. The children learn English through contemporary pop songs. Sometimes the lessons focus on the artist (for example the children need to describe Justin Bieber's clothes and style) and sometimes they focus on clips (e.g. put the pictures of the accidents from Noah Kahan's videoclip in the correct order) or they may even focus on song lyrics (using the Sheppard song *Coming home* to talk about the things you miss when you're away from home). The children learn English words and sentences during the lessons.

The skills (reading, listening, writing and speaking) are practised extensively during each lesson.

There are also English tests. The children can prepare for these tests using the 'leerwerk' (revision work) on Google Classroom. The test dates will be communicated via Parro.

Creative education lessons

We spend two hours per week on creative education lessons. During these lessons we focus on the creative development of the children in various different ways. Every week we give the children a lesson from the 'Laat Maar Zien' course. This focuses on visual and cultural education. Juf Anna will give music lessons in the class. We also pay attention to ICT skills and media literacy during these lessons.

Typetuin – typing course

After the autumn half-term holiday the children will start to learn how to type

using Typetuin (Type garden) Typetuin is an online programme that teaches the children how to type using all their fingers and thumbs (touch typing). At the end of the course they should get their typing certificate. We practise this at school for at least a quarter of an hour four times a week. The children also need to practise typing at home for a quarter of an hour four times a week.

Homework

In group 6 the children get revision work for Blink, Topomaster and English. Your son/daughter will also have homework to do once a week on Wednesdays. On Wednesdays, the children must complete their homework via www.redactiesommen.nl or www.spellingoefenen.nl.

We expect the children to use a diary. This can be a paper diary or a digital diary, whichever your child prefers. Secondary schools also use paper and digital diaries so your child can decide which they prefer. The homework assignments can be found on the Google Classroom and Parro agendas.

Parental involvement

An important part of your child's growth is the golden triangle between children, parents and the school. Your child's well-being is paramount and this triangle is essential to ensuring that your child develops according to their abilities. The chart below shows you how you can support your child.

How can I support my child's education?		
I am involved	I help my child	I know what my child can and cannot do
For example: I	For example by:	For example:
Show interest in school, I ask: what did you learn today?	Eating healthy food	Learning, behaviour and attitude to work at school
Talk about how things like Dutch, English and maths are going. Talk about their behaviour too	Going to bed at bedtime and sleeping well	What my child understands or doesn't understand. Things I can ask or tell my child and things I cannot
Help my child to do the best they can at school	Getting enough exercise	What my child can achieve, not only this school year, but in the future and after primary school
Do educational things together	Coming to school on time	
Stand by the school rules	Knowing what my child is doing and who they are with	
	Making sure that my child doesn't spend too much time on their Ipad or	

Say something nice or kind about the teacher or to the teacher	mobile phone or watching television	And....
Think along the same lines as the school	And....	
And....

Social and emotional development

In group 6 children undergo further changes in their social and personal development. Below are a few key aspects of the social and emotional development the children will experience this year:

- Self-image and self-confidence – children gain a more realistic understanding of their own talents and limitations this year when comparing themselves to others becomes more important.
- Group formation and friendships: friendships become stronger and are based on trust and shared interests. Groups are created and acceptance plays a major role which, hopefully, prevents exclusion and bullying.
- Empathy: children learn to understand each other's feelings better and become more considerate of the needs of others.
- Emotional regulation: they learn to manage their emotions more effectively as their self-control increases although difficulties can still occur in situations of conflict.
- Responsibility: an increased desire to be independent and in control of decision making occurs which in turn requires adult support.

In group 6 we also have certain expectations of the children. We encourage independence by allowing them to think about problems and possible solutions themselves. Responsibility is equally important as they need to make sure they remember their P.E. kit or remember to do their homework.

The ability to plan is also a key element which needs to be developed in group 6, whether it's writing a book review or preparing a presentation, all these activities require planning. We can support the children and help them to plan but ultimately the responsibility lies with them and they must submit their assignments on time.

**General information
group 6
school year 2025-2026**

We would appreciate your support, as parents, and look forward to working together to achieve the best results.

Important dates and events in group 6

Introductory meeting:	9 September 2025
Progress meetings:	18 November 2025
First round IEP-tests:	January/February 2026
Report 1 to be taken home:	20 February 2026
Second round IEP-tests:	May/June 2026
Secondary school level chat:	10 and 15 June 2026
Report 2 to be taken home:	26 June 2026

A number of other trips and activities will be planned during the school year. We will let you know about these extra activities and will also request your help on these special days via Parro. If you have the time and would like to come along to help us on these days – please check Parro!

We are looking forward to a great school year and would like to thank you in advance for your cooperation.

Patricia Langeveld en Esther de Jong
