

**General information
group 7
school year 2022-2023**

Personnel

group 7/8		
Tues to Fri	Juf Annick	annick.vandervoort@jl.nu
Mon	Meester Berend	berend.vandijk@jl.nu

group 7		
Mon to Fri	Juf Lisa	lisa.holthuijsen@jl.nu

organisation		
Special needs co-ordinator Mon, Wed, Fri	Petra Voorderhaak	petra.voorderhaak@jl.nu
Teamleader Mon to Fri	Annick van der Voort	annick.vandervoort@jl.nu
Head Mon, Wed, Thus	Lisa ter Veen	lisa.terveen@jl.nu

Start of the day

The classroom opens at 8:05am and lessons start at 8:15am. We expect group 7 children to come into the classroom on their own whenever possible.

Physical Education P.E.

We have P.E. lessons every Monday and Friday. Miss Brittany von Gerhardt is the P.E. teacher. Please provide your children with sports clothes and training shoes for the lessons. Children with long hair will need hairbands to tie their hair up, it might be a good idea to put extra hairbands in your child's gym bag. Please arrange this with your child.

Food and drink

The children keep their snack in their bag. The bags are kept in a specific place in the corridor. We think it's important to give your child a snack that is as

healthy as possible. Wednesday is 'gruitdag', so all the children must only bring fruit or vegetables, for their snack, on this day.

Birthdays

We celebrate your child's birthday in the classroom. Your child can give a treat to their classmates and go round the other classes in the lower school. In the lower school they must only go round the classes on the ground floor.

A children's birthday party is, of course, very pleasant for your child and the children who are invited, but to avoid the other children's disappointment, we request that you hand out the invitations outside the school and not in the classroom.

Subjects and course books

You can see which others subjects and courses we follow in the school guide on the website. Please see below for extra information about the subjects that are particularly relevant for the children in group 7.

Arithmetic and numeracy

We will be using a new maths coursebook this year: De Wereld In Getallen 5 - WIG 5 (The World in Numbers). This takes over from the coursebook we used in previous years. However, this new book has a different structure and may take the children some time to get used to. WIG 5 has more focus on the different levels and abilities of the children than the previous coursebook. Therefore, we can offer each child, depending on their mathematical ability, what they really need. The big difference between this year's coursebook and last year's is that the children will no longer be using a maths book and squared paper, they will be using a workbook. There is also a computer programme which they can use to practise.

Reading

This year we will be working with a new 'Blink Lezen' course. Why do we like reading? The answer is simple: because we want to know what happens next in the story. This inquisitiveness is the basis of 'Blink Lezen'. It is a complete reading method for groups 4 to 8. The course is a combination of technical and fluent reading, reading comprehension (and watching/listening), in-depth reading, free reading and reading aloud. 'Blink Lezen' increases the children's inquisitiveness and interest in reading with compelling stories. The various different assignments are never boring. Reading opens up the world to the children, a world full of exciting events, special experiences and surprising people. The children discover more about the world around them and themselves.

World orientation (working in themes and learning by discovery)

We use the 'Blink Wereld' coursebook for world orientation lessons. Blink is an integrated course which teaches geography, history, the natural world and technology.

There are also tests for this subject and we call these tests 'Test jezelf' (test yourself). The children can prepare for these tests using the 'leerwerk' (revision work) on Google Classroom. The test dates will be communicated via Parro.

TopoMaster

We use the online programme 'TopoMaster' for topography (physical geography). 'TopoMaster' is an exciting online game where the children learn about physical geography. The app was developed by National Geographic Junior and contains beautiful images and fascinating information. Through topography the children learn special facts about animals, buildings and the landscape, which helps them to remember the toponyms (names of places) better. 'TopoMaster' consists of three parts: the Netherlands, Europe and the world, each part contains several levels.

In group 7

Last school year the children learned about the Netherlands. In group 7 the focus will be on Europe.

For group 7C

Last school year the children learned about Europe. In group 7C the focus will be on the world.

The children can prepare for these tests using the 'leerwerk' (revision work) on Google Classroom. The test dates will be communicated via Parro.

Engels

We use the 'Blink Engels' course to teach English. Each lesson focuses on a well-known song. Music has a positive impact on children and encourages them to move, which also helps them to remember the things they have learned. The children learn English through contemporary pop songs. Sometimes the lessons focus on the artist (for example the children need to describe Justin Bieber's clothes and style) and sometimes they focus on clips (e.g. put the pictures of the accidents from Noah Kahan's videoclip in the correct order) or they may even focus on song lyrics (using the Sheppard song *Coming home* to talk about the things you miss when you're away from home). The children learn English words and sentences during the lessons.

The skills (reading, listening, writing and speaking) are practised extensively during each lesson. Children who need more challenging English lessons can

study on their own using the 'Blink Engels' Grammar app.

There are also English tests. The children can prepare for these tests using the 'leerwerk' (revision work) on Google Classroom. The test dates will be communicated via Parro.

Creative education lessons

We spend two hours per week on creative education lessons. During these lessons we focus on the creative development of the children in various different ways. Every week we give the children a lesson from the 'Laat Maar Zien' course. These lessons focus on visual and cultural education. We also have music lessons once every two weeks. These lessons are done alternately by the Pier K music teacher and the group 7 teacher. We also pay attention to ICT skills and media literacy during these lessons.

Homework

In group 7 the children get revision homework for Blink, Topomaster and English.

Your son/daughter will also have to do homework twice a week until the spring break. After the spring break this will increase to three times per week.

We expect the children to use a diary. This can be a paper diary or a digital diary, whichever your child prefers. Secondary schools also use paper and digital diaries so your child can decide which they prefer. The homework assignments can be found on the Google Classroom and Parro agendas.

Important dates and events in group 7

First round IEP-tests:	February 2023
Report 1 to be taken home:	24 February 2023
10-minute chat:	9 and 14 March 2023
Cycling proficiency theory exam:	27 March 2023
Cycling proficiency practical exam: (confirmed)	April/May 2023 (date to be confirmed)
Second round IEP-tests:	June 2023
Preliminary secondary school level chat:	6 and 11 July 2023
Report to be taken home:	14 July 2023

A number of other trips and activities will be planned during the school year. We will let you know about these extra activities and will also request your help on these special days via Parro. If you have the time and would like to come along to help us on these days – please check Parro!

We are looking forward to a great school year and would like to thank you in advance for your cooperation.
